

KTM

KTM tank bottom valve completely drains off fluids from the tank bottom and maintains optimum performance of the whole tank

Features

- Construction prevents fluid accumulation at point of connection to completely drain fluids from the tank
- Both automatic and manual operating methods available, depending on application conditions (Manual devices can be mounted on automatic operation type)
- In the event that a viscous fluid adheres to the inner surface, a cleaning nozzle can be mounted
- Compact mounting design available where space is a premium
- Various body and trim material can be chosen in accordance with specified conditions
- For remote control operation, an automatic tank valve with a mounted cylinder drive is readily available
- Purging hole optional

*The valve performance is integral to the tank bottom application. Consequently, it is important to choose a suitable valve with utmost care given to fluid pressure, temperature, viscosity, corrosiveness, etc. and with the mounting environment thoroughly taken into account.

General applications

The tank bottom valve is mounted to the bottom of reactors and various liquid storage tanks and is popularly used as the main valve for containers and a variety of equipment.

Technical data

Models / Sizes : ET101 / DN 25 to DN 250
 : ET103 / DN 25 to DN 150
Pressure rating: ASME Class 150 / JIS 10K
 (JPI available)
Test pressure : 1.0 MPa / DN 25 to DN 100
 0.6 MPa / DN 125 and larger
Temperature : -20°C to 230°C

KTM Tank Bottom Valves

Series ET Sizes DN 25-50 Class 150

Ball type tank valve

Operating the handle or the drive unit rotates the ball 90 degrees to discharge the liquid. When open, there are no obstacles in the port and a full port is obtained, allowing a large amount of fluid to drain. Model ET101 can accommodate both manual and automatic valves, while model ET103 is fitted only to automatic valves.

Double acting dimensions (mm) ET101 / AGN06 to AGN13, AWN13 to AW28

Valve size (DN)	Ød	ØD	H	L	L ₁	Actuator model*	W	l ₁	l ₂	m ₁	m ₂

* The above actuators are chosen for normal fluids. For fluids that increase the torque due to viscosity, foreign matters, etc., actuator shall be chosen separately.

For other information including the sizes of the following automatic valves, please consult for the details.

- Valve model : ET101
Actuator model : AGN-S, AW-S (Spring return)

For other information including the sizes of the following automatic valves, please consult for the details.

- Valve model : ET103
Actuator model : AGN-D, AW-S (Spring return),
AK series (Spring return, double acting)

Note: The above drawing shows AGN double acting type.

KTM Tank Bottom Valves

Series ET Sizes DN 25-50 Class 150

• The figures show a product in ASME Class 150 (JIS 10K) of size DN 25 to DN 100 for model code ET101.

Parts list

ASME Class 150, JIS 10K Material code

No.	Parts name	31-1T / E / G	32-1T / E / G
1	Body	CF8 (SCS13A)	CF8M (SCS14A)
2	Cap	CF8 (SCS13A)	CF8M (SCS14A)
3	Tank base	CF8 (SCS13A)	CF8M (SCS14A)
4	Ball	CF8 (SCS13A)	CF8M (SCS14A)
5	Seat	PTFE or RPTFE	PTFE or RPTFE
6	Gasket	PTFE or RPTFE	PTFE or RPTFE
7	Bolt	304SS (SUS304)	304SS (SUS304)
8	Stud bolt	304SS (SUS304)	304SS (SUS304)
9	Nut	304SS (SUS304)	304SS (SUS304)
10	Shaft	304SS (SUS304)	316SS (SUS316)
11	Thrust bearing	PTFE	PTFE
12	Stem bearing	RPTFE	RPTFE
13	Gland packing	PTFE	PTFE
14	Gland	SUS316LSS	SUS316LSS
15	Gland flange	304SS (SUS304)	304SS (SUS304)
16	Gland bolt	304SS (SUS304)	304SS (SUS304)
17	Stopper	304SS (SUS304)	304SS (SUS304)
18	Snap ring	304SS (SUS304)	304SS (SUS304)

• Materials in parentheses indicate equivalent JIS material

Note

The right table indicates the seat rating for PTFE (T) seat. For RPTFE (E / G) seat, please consult for the details.

Valve size (Full bore)

- ① DN 25 to DN 65
- ② DN 80 to DN 100
- ③ DN 125 to DN 150
- ④ DN 200
- ⑤ DN 250

Maximum pressure

- Ⓐ DN 25 to DN 100
- Ⓑ DN 125 to DN 250

Pressure - temperature rating

For applicable working temperature and working pressure range please refer to the following rating table. Using valves outside the range of the rating table may damage the valve or its components and result in external leakage or seat leakage.
